

## Vehicles and assets management and optimization with full tracking and active monitoring

- Vehicle fleet management (small or large fleets)
- Display real-time location and status, and invoke actions based on status analysis
- Status analysis is executed through complex algorithms defined by the fleet manager according to its needs
- Reports and playback provides detailed historical analysis, including summarized reports
- About 2 years work of 10 developers. Total over 20 man years
- Deployment through Ituran's clients started Q2/2009

### mPrest part in VFM

- mPrest led the architecture and development of a vehicle tracking and location system.
- This software serves as the main situation room system.
- The system incorporate mClient which provides easy configuration and mCore as the system objects management infrastructure.
- The system was designed to be a long running system, handling hundreds of emergency situations a day.

## mPrest Fleet information Inventory

### Inventory

- Fleet inventory with user definable specifications
- Fuel & fluids inventory tracking & auto-re-ordering
- Detailed description of each part in inventory
- Automated parts histories of each use and transaction
- Automated parts warranty tracking & reporting
- Warranty notices at time of repair order entry
- Produces warranty labels at time of repair order entry
- Automatic reorder based on Min / Max
- Parts cross referencing and multiple sites
- Prints and tracks Purchase Orders
- History of use, received, returns & adjustments
- Tracks & records part transfers between fleet shops
- Attach unlimited photo, schematic & document images

### Data Tracking

- Prints, controls, and tracks Work Orders
- Prints warranty tracking & labels at time of repair
- racks work pending, complaints & campaigns
- Unlimited license & permit tracking
- One click repair order template reduces data entry
- Automated license & permit renewal notices
- Utilization measured by up to 3 different meters
- Daily "Work in Progress" reminder feature
- Fast access to emergency contacts
- Tracks date/time in and out on each repair order
- CDL licenses & physical exam expiration tracking

### Entity Management

- Automatically catches unit & component warranty
- Unit & component warranty notices & reporting
- Fast lookups.
- Attach unlimited photos, documents, or scanned images
- Track any person attached to your fleet operations
- Complete mechanic & driver files and records
- Automatic labor productivity tracking
- Attach photo images to each person's file

### Preventive Maintenance

- Complete maintenance and repair histories
- Automatic PM inspection scheduling
- Customizable PM checklists for each unit
- Downtime tracking & analysis
- Vehicles go from PM service to PM service without a breakdown.
- Provide clear instructions to mechanics for each unit serviced.
- Identify and reduce rework by mechanics and vendors.
- Identify high cost units and why these units are high.
- Make 100% maintenance decisions on facts, not gut feel.
- Provide an easy method to schedule and track problem drivers

### Financial and Productivity

- Parts, labor, tire & component costing
- Cost per mile, hour or your measurement
- Automated fleet budget control and comparison
- Divide & spread costs to multiple units at once
- Fuel & oil consumption & mpg with histories
- Automated fuel, oil and fluid costing
- Track fixed cost items like depreciation & more
